- Made with high-quality vegan ingredients backed by verifiable science

VERIFIABLE SCIENCE

MotilPro supports serotonergic and cholinergic neurotransmission in the G.I. tract.¹ 5-HTP is absorbed by enterochromaffin cells in the epithelium and is decarboxylated to serotonin using pyridoxal 5' phosphate as a cofactor.² Serotonin stimulates enteric neurons through activation of 5-HT4 receptors, which contribute to healthy motility.³ Ginger modulates serotonin signaling by additional 5-HT4 stimulation and by modulating serotonin type 3 (5-HT3) receptors in the enteric nervous system and brain stem, supporting gastric emptying, intestinal transit, healthy visceral sensation and upper G.I. comfort.⁴ Acetyl-L-carnitine supports autonomic neuronal health.^{5†}
